

1 Port Intelligent CANopen Master Interface Module

I-8123W

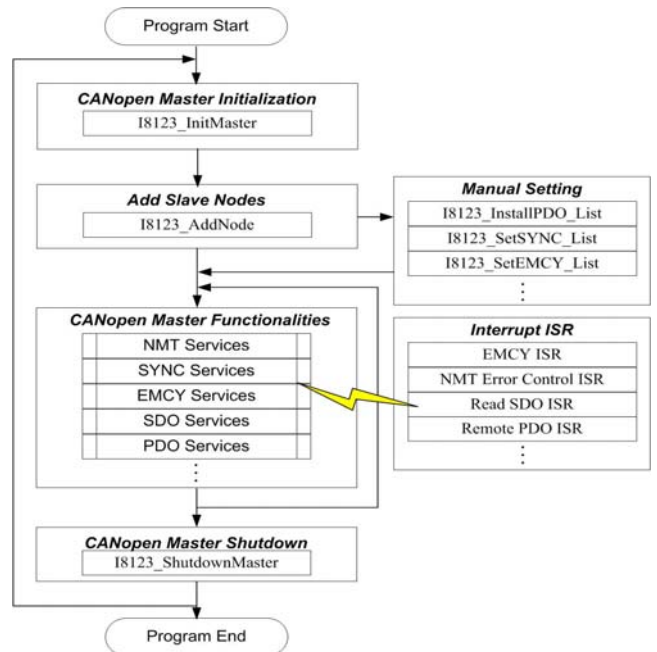

Dimensions

The I-8123W follows CiA CANopen specification DS-301 V4.02. It is a high price/performance CANopen master. With the ViewPAC or WinPAC series MCU (main control unit), it can be generally applied in the industrial automation, building automation, vehicle, and embedded control network. Besides, owing to the feature of building the CANopen protocol firmware inside, users can easily access the slave devices via I-8123W without studying or dealing the complex CANopen protocol. It is helpful to reduce the development cycle time and let users set up their CANopen application more quickly and easily.

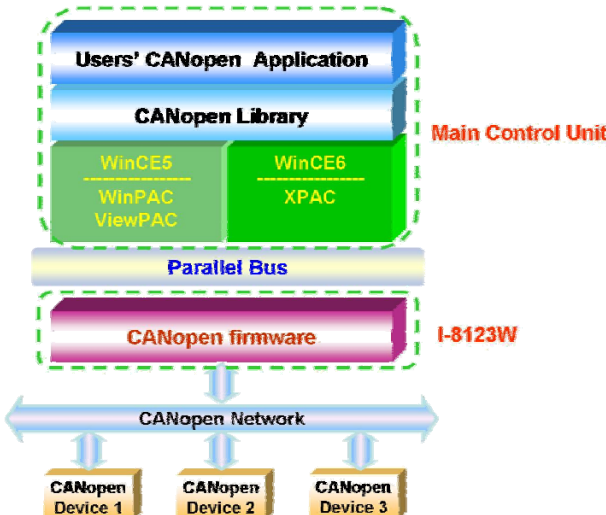

Features

- NMT Master.
- CANopen version: DS-301 V4.02
- Support Node Guarding and Heartbeat Consumer error control. protocol
- Provide EMCY and NMT Error Control interrupt service function
- Provide “master listen mode”
- Provide Dynamic PDO, acyclic and cyclic transmission
- Support ViewPAC and WinPAC series MCU
